DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,2,7-16,20-26,28,29,31-38 are rejected under 35 U.S.C. 102(b) as being anticipated by Brotman et al (5917889).

As per claims 1,14-16,24-26,33,35,36, Brotman et al (5917889) teaches a voice recognition accuracy (col. 2 lines 45-55) comprising:

“prompting a user.....characters”, “identifying a subset....characters”, “generating a dynamic.....items” as prompting and creating a dynamic grammar (fig. 2, and col. 4 lines 46-67)

“prompting the user.....grammar” as voice prompt and recognition (Fig. 2, subblocks 640-730)

executing a search using the query, adding a query to the search, and developing a grammar from this search query (col. 5 lines 35-67);

As per claims 2,20,29 Brotman et al (5917889) teaches “prompting a user.....query term” as N character submission (col. 4 lines 36-41)

As per claims 7,21,22, and 32, Brotman et al (5917889) teaches user selected keypad entry (col. 4 lines 36-41)

As per claim 8, Brotman et al (5917889) teaches “user uttering the characters and using the keypad entries of the.....character” as using utterances to match (col. 4 lines 15-35).

As per claims 9,34, Brotman et al (5917889) teaches dynamic grammar usage (col. 4 lines 47-52)

As per claim 10, Brotman et al (5917889) teaches extracting text from a subset of items derived from a database (col. 5 lines 25-30)

As per claims 11,28,38, Brotman et al (5917889) teaches storage of the subset (col. 5 lines 18-24)

As per claims 12,31, Brotman et al (5917889) teaches a fixed number of input characters (col. 5 lines 25-30)

As per claims 13,23,37, Brotman et al (5917889) teaches determination of a threshold number of characters (col. 5 lines 25-30).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 3-6,17-19,27, and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brotman et al (5917889) in view of (Weber (6434524).

As per claims 3-6,17-19, and 27, Brotman et al (5917889) does not explicitly teach using subcategories labeled as “author”, however, Weber et al teaches an object interactive user interface using speech recognition with subcategories of author (Weber, col. 6 lines 56-63). Therefore, it would have been obvious to one of ordinary skill in the art of speech signal processing to modify the teachings of Brotman et al with categorization of speech inputs, such as author, because it would advantageously allow the system to be adapted to a specific task, thereby limiting the amount of relevant data, and therefore speeding the search engine (col. 2 lines 45-55).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see related art listed on the PTO-892 form.
